

# OPERATION RESEARCH IN SENG WAI ENGINEERING WORKS

Prepared by: Loo Jun Mun

## ABSTRACT

---

For clear understanding, basically this report is divided into **5** main chapters. They are **Introduction, Project Construction, Result and Analysis, Advantage and Applications**, and lastly is **Conclusion**. By reading through and understand all the sections step by step, you will able to understand the principle of my research project in the introduction part, all the details information of the title and the objective along the scope of the project will be shown on it.

In the Project Construction, the working step and the progress in getting the information needed in order to complete my research will be discussed in more detail. In the next chapter, Result and Analysis were carried out the discussion and the improvement of the operation research report analysis. For the chapter of Problem and Possible Solution is the detail about what problem will occur during the process of the tool and die mould making will occur and the possible solution on it.

The Advantage and Application chapter discusses the advantages and the limitation of the newly improved idea implement into the mould making process. Finally, the summary of the whole project will be presented in the last chapter that would be the conclusion.
