

# **ERGONOMIC MOTORIZED ROCKING CHAIR**

Prepared by: Tan Soon Hou

## **ABSTRACT**

---

The title of this project is Ergonomic Motorized Rocking Chair. The main purpose of doing this project is to make a rocking chair move automatically without using any human strength, the safety of the chair and the ergonomic design dimension that will make people feel comfortable when sitting on it.

In this final report, I will show all the components or equipments that I am going to use and the most important is the function of the rocking chair. The 3 most important things of my rocking chair are the movement and frequent, safety, and ergonomic dimension.
