

GARBAGE COLLECTOR WITH A SINGLE OPERATOR

Prepared by: Victor Goh

ABSTRACT

Today's changing economy and technology require improve efficient, additional power and extended service life in modern on the on and off highway equipment. So a new version of improve version are need to be improved for example, the Honda Motor company. Honda Company always improves their vehicle by introducing new types of improved vehicle either in technology or in design. So for a new design of a garbage collector is needed in order to follow the advance of the technology to suite today's need. This design is to give the reader a brief idea the working of the truck and the design which related to the design component.
