

SEDIMENTATION PROCESS IN SEWAGE WASTE TREATMENT PLANT

Prepared by: Chian Kian Wai

ABSTRACT

The main purpose of this project is to study the sewage wastewater treatment process that is carried out to the collected wastewater from houses and workplaces before discharging it to the river, so that the treated wastewater will not caused harmful effects on the environment.

After gone through the treatment processes, the treated water will be discharged to the river, but the water must meet the wastewater regulation in terms of the BOD, suspended solid, fecal coliform bacteria, and pH.
