

# COMPARISON BETWEEN TWO STROKE AND FOUR STROKE ENGINE

Prepared by: Ng Chin Aik

## ABSTRACT

---

In this project, the fundamental operations of 2 and 4 stroke engine are introduces. This is the most basic theory to know about engines. This fundamental operation is to show the basic working of an engine.

Furthermore, some experiments, basic theory and calculations are also carried out in these project. The aim of experiment is to determine the engine horsepower and torque. Horsepower and torque are use to indicate the engine performance. Thus, a comparison of performance and operations between 2 and 4 stroke are discussed in this project book.
