

# HOVERCRAFT

Prepared by: Yap Chee Ken

## ABSTRACT

---

This project – Hovercraft, I am doing this project with my classmate. The main objective of this project is built a model of hovercraft and just only lifts up the Hovercraft model with supplying a 5 horsepower engine. From this project, we can learn the concepts and theories about hovercraft such as the circulation of air of Hovercraft, how engine and propeller to built up the air pressure in the craft, craft skirting and many others.
