

THE STEERING SYSTEM AND AN INTRODUCTION TO THE ENGINE OF A GO-KART PROTOTYPE

Prepared by: Chong U Fu

ABSTRACT

My project topic is the Steering System and an Introduction to the Engine of a Go-Kart. For the simulation part, we have based our study on the assembly of a scaled-down version due to limited resource, time and knowledge. Although it is a small model of a real go kart, its part and operation are all true and made according to a life-sized version.
