

# PIPING SYSTEM FOR A FIVE STOREY APARTMENT

Prepared by: Subramaniam S/o Kupusamy

## ABSTRACT

---

This project report includes the objective of my project, the design of the system and the calculations. In the body part of the project report, I have clearly indicated the calculation on how to find or calculate the flow rate at each flat, the diameter of pipe, the loading units, the velocity in each pipe and the tank size. In the body part also I have sketched my design of the pipes including the installation of the pumps and tanks.
