

DESIGN AN AEROGENERATOR USING AUTOCAD R14

Prepared by: Hoo Yee Jun

ABSTRACT

In this project, an aerogenerator is created with computer graphics models using AutoCAD Release 14. The main objectives of this project is to introduce techniques of using AutoCAD and importance features of AutoCAD to create aerogenerator, develop technical skills for displaying data graphically, so that a design idea become reality. Secondly, recognize mechanical devices that are design to transmit motion from one machine element to another.
