

AUTOMATED GOLD DRIVING RANGE

Prepared by: Lim Eu Keong

ABSTRACT

The purpose of this project is to design a special machine to ease golfer while they are practicing on how to start their first hit. Understands how to design an electronic circuit board to control the working mechanism of this machine.

This circuit is made up of few electronic devices:

1. Electronic light control switch
2. Relays
3. D.C. 12V motor
