

UMBRELLA DRYER

Prepared by: Loh Lake Chew

ABSTRACT

In this particular section, the report is written down in order to give an overall view or picture to reader so that they can have a better understanding on what actually is about my project title.

My project title is Umbrella Dryer, which is a device that can dry the umbrella with some specific mechanism. All the mechanisms and theory that have covered by this device will be mentioned in the latter part in this final report. Besides these, mechanical drawings, photos and also some initial designs will also be exhibited. The investigation and research also have been discussed herein. Subsequently, the types of the components, materials, properties and advantages of the design will also be the elements to be conveyed in the report. Further, constructions and product cost will be discussed. Lastly, this report shall be ended by the sections of conclusion and appendix.
