DESIGN OF A 3D PANTOGRAPH

Prepared by: Ng Chia Peng

ABSTRACT

The project report will explore the applications of the 3D pantograph in industries, the construction of my 3D pantograph design, and the conclusions ad ways to improve on my design in details. The whole project took 14 weeks to research and complete. All the data is compiled and a model is built during the 14 weeks given to us. A record of the manner in which the project is planned and done can also be found in this report.
