

AUTOMATED PET FEEDER

Prepared by: Choong Heng Mun

ABSTRACT

The following pages represent my entire project and progress for the whole semester. It is my intention to inform readers that the idea for this project solely comes from my imagination. It is also that the help of my supervisor, friends and resources found on the Internet, which combines to produce this automated pet feeder. This includes the construction of y model, the usage and practically in daily life, and principle and reasons behind each sections of the design can be found on the automated pet feeder. There are also many other facts and further improvements that are discuses in the sections like introduction, construction, analysis and conclusion.
