

THE DESIGN OF AN AUTOMATED BAKERY PROCESS

Prepared by: Jefferson Hutagalung

ABSTRACT

My project title was 'The Design of an Automated Bakery Process'. This project was built as a small automation in making cookies or biscuits. As one of the bakery, cookies have been part of our meals since human discovered flour. And this project report will explain the reason I made a research on it and it contains the information, hand sketch or the model, and illustration of the finished model, including the construction of the model, also the difficulties in this project.
