

THE DESIGN OF NESTED WIND POWER PLANT

Prepared by: Teh Chun Sing

ABSTRACT

Eight millions wind turbines! What do you think few wind farms is going to be use? But how big is one wind farm? The Nested Wind Power Plant saves space. And how wind can generate electricity for our daily needs? The report will let you see how a nested wind power plant can generate the same amount of electricity energy for your daily needs, and comparing the design of other wind power plants.
