

AUTONOMOUS ROBOTIC DEVICE

Prepared by: Tham Kam Hon

ABSTRACT

RCC-1 is an autonomous robotic device that has various uses to us. The content of this report is mainly describing its specification, how it is constructed, how it functions, its advantages and disadvantages and references that has been carried out to complete this project. One if these applications are to capture a nature of wildlife or why it is used to go inside a pipeline or a roof? Want to know more on how it is capable of doing such task? Just read through this report and you will know what marvelous device it is. Calculations were also included in this report to let you know what are the formulae that are used in completing this project.
