

THE DESIGN AND MANUFACTURE OF XYZ MULTI AXIS SYSTEM

Prepared by: Toh Tieng Chiah

ABSTRACT

Project title is 'The Design and Manufacture of XYZ Multi Axis System'. This project report contains all the relevant information about my project. It includes all the design diagrams that I have drawn using CAD software. Besides that, important information about analysis of design and calculations are also included. This report answers the questions that have been brought up during the oral presentation. Some information that I have included in this report is taken from sources such as the Internet and library. For the information, I have included a reference number. The name of the source of the information can then be referred to the section Reference at the back of the report.
