

# **HARVESTING OIL PALM FRUIT BUNCH**

Prepared by: Lee Wai Leong

## **ABSTRACT**

---

Design of a harvesting oil pal fruit bunch, which is to workers to save the time collecting the broken fruit from the bunch whereby the worker productivity can be improved.

The harvested oil palm fruit bunch will be intact after falling on the ground. As the oil palm fruit bunches falls intact on the ground, the oil palm loose fruits would not scatter on the ground.

In addition, harvesting oil palm fruit bunch also increase in productivity per worker and the maximum fruit recovery when the worker doing their harvesting. Reduction in cost of the labor.
