

# FRUIT PEELER & SEEDS REMOVER

Prepared by: Ong Teck Chuan

## ABSTRACT

---

This project is growth of our studies so far in Diploma as a Mechanical Engineering Student. As such represents my ideas regarding how to built a Peeling Machine by the appreciate use of skill and knowledge learned throughout the semester. The objective of this report is to have:-

- 1) Applied a range of techniques for generating, evaluating and selecting design concepts to met specified requirement
- 2) Understood the practical consideration so often need to modify theories learned and acquired a range of interpersonal skills.
- 3) Techniques of preparing an informative and clear portfolio in explaining the details of the project itself.
- 4) Applying knowledge learn of working with raw material and usage of different machining in producing a prototype with good quality.
