

COCONUT DEHUSKER

Prepared by: Liew Sheng Yee

ABSTRACT

In my report, there will consist of the design, the analysis of the forces coming in and also the information concern about the project. First I will introduce coconuts dehusker that I design and also my in for my project. Then I will start mention the construction of it, and design I have accomplished. And then analysis the incoming forces and all the test and data I have done and measured. And also will introduce the engineering method I used I my project. At the last I will also introduce the way operate my prototype.
