

# **CONSTRUCTION OF BATTERY OPERATED ADJUSTABLE (SPEED) WHEELCHAIR**

Prepared by: Bong Yee Wooi

## **ABSTRACT**

---

The purpose of the project is design for handicap. Construction of Battery Operated (Speed) Wheelchair is suitable for handicap because it convenient and portable enough to go where user want to go.

To respect the format of project report and allow you understand with clearly, I would like to divide the report to 5 categories that is introduction, body, components of prototype, results and analysis and conclusion. The introduction consists of definition of title and purpose of project. I would use the clear method to explain the procedure.
