

REAR HYDRAULIC LIFT FOR LORRY

Prepared by: Cheong Cheng Zee

ABSTRACT

The title of my final project is 'Rear Hydraulic Lift for Lorry'. Basically, this project is to design a hydraulic system and applied it to the rear part of lorry. The main purpose of using hydraulic system is to control the movement of the components, which is the place where the goods are. The use of this design is to make the loading and unloading of cargo into lorry much easier.
