

MODEL DESIGN OF THE MULTIDIRECTIONAL CONVEYER SYSTEM

Prepared by: Kevin Kan Tjen Fei

ABSTRACT

This report will mainly be comprised of the design of the end product (working model) and the analysis that have been done while designing the necessities. The report will also cover results of the analysis while being a guideline to understanding the whole nature of this project. Besides there will be visual display on the product and design construction plus a thorough guide to the completion of the stated project.
