

DESIGN OF A PORTABLE BILLBOARD FRAME WITH A DIMENSION OF 2M X 2.5M

Prepared by: Wong Sang Sing

ABSTRACT

Billboard advertising is the most common way of advertising. Every day now and then, we see billboard stagnated on the rooftops of the skyscrapers, and along the both sides of the roads and highways. These billboards are huge and costly, normally,. Besides this, billboards are also used in exhibition centers to put up posters and printed document. And this type of billboard is really amazing, because they are portable and handy.
