

DESIGN A WOODEN MOULD TO FABRICATE A FRP BODY FOR A SINGLE SEATED HOVERCRAFT

Prepared by: Hoo Yee Jun

ABSTRACT

The content of the report is providing some general information in hovercraft line. It is introduce the hovercraft-engineering concept. Besides, there are several guidelines to construct a model hovercraft. The aim of this report is given a roughly idea- study of design a mould of hovercraft.

A hovercraft is not widely used in Malaysia. The study of hovercraft is truly across various of engineering application. For design a mold of hovercraft, we need to know the impotence of material selection. Designing a mold is a first step before construct a hover craft.
