

REDESIGNED A STEERING SYSTEM FOR A GO-CART

Prepared by: Liew Ket Kiong

ABSTRACT

The title of my project is redesigned a steering system for a Go-cart. Go-cart is a small racing car mainly for entertainment use, and steering is one of the parts of the Go-cart. The content of this project report is briefly describe about the introduction, construction, calculation, objective and learn more about steering and Go-cart. I also clearly described what engineering methods I applied to design this steering. Inside this booklet there are also some illustrations of my project. There are also comments and recommendations for further work to be carried out where appropriate. The references I have used and the web sites I have visited also stated inside.
