

DESIGN A EQUIPMENT TO MEASURE THRUST FORCES

Prepared by: Wong Liang Feng

ABSTRACT

By reading this report you will get to know more about a Force Measuring Equipment. Besides that, you will also get to know the specification of my project, how it works, what it is it usage and its object. I also clearly described what engineering methods I a plied to design this Force Measuring Equipment. Inside this booklet there are also some calculation of shaft and ball bearing. Photo list of actual outcome of my project are shown.
