

PAPER MONEY COUNTING MACHINE

Prepared by: Ooi Puoh Boon

ABSTRACT

Project title for engineering design project course is Paper Money Counting Machine. This machine consists of low cost materials and components. It is not a high technology or complex machine. So, overall this is a easy to operate machinery that is suitable for all range or classes of people. The whole project design is shown clearly in the figure below. Equipment used in these projects is dc motor, rollers, Perspex, spring, aluminum angle bar, sensor and digital counter.
