

PORTABLE CLOTHES DRYING EQUIPMENT

Prepared by: Lo Shin Hor

ABSTRACT

In this report, I have included the work that have been carried out in accomplishing this project, the evaluation of the existing products, the material used some of the criteria of the new design. Other than that, I will also show some photos concerning my prototype and the use of it. The functionality and its pros and cons about the design will be discussed. However, the problem encountered would also be indicated for the references that actually what happen during the progress.
