

PORTABLE AIR AND OIL EXHAUST SYSTEM FOR KITCHEN USE

Prepared by: Loh Chun Hoong @ Peter Loh

ABSTRACT

‘Portable Air and Oil Exhaust System for Kitchen Use’ is the title of my final project. Actually we can easily know what is the function of this project when we first listen or read the title.

The project I’m doing is to inhale dirty air and oil from kitchen while we are cooking. ‘Portable Air and Oil Exhaust System for Kitchen Use’ is use to make sure the air in the kitchen always clean and free from dirty air and oily smoke. This ‘Portable Air and Oil Exhaust System for Kitchen Use’ contain of 2 fans that working as motor to inhale air and oily smoke. This ‘Portable Air and Oil Exhaust System for Kitchen Use’ also consist of 2 filters that use to filter up the dirty air and oil in the surrounding area.
