ABSTRACT

I will describe my project outcome step by step from the minor issue to the important part. In the preface section, it having the 'acknowledge', 'declaration', 'abstract' and also the 'content' of my project report.

In the body section, I will describe the 'objective' of my project, the 'circuit analysis' on how the circuit work and the components description that using in my circuit. In the 'project circuit construction', I will describe the step on how I doing my project. The result is describe is to describe the output result of the circuit. The 'problem encountered' are to describe the problems I faced when I am doing my project and how they are overcome.
