

BABY TROLLEY CAN GOING UP THE STAIR

Prepared by: Tai Woon Chein

ABSTRACT

My project title is the baby trolley that can go up the stair.

As the whole of the project, I will explain my product. It is separated to few parts, from starting to design until the product is produced.

The objective to design this kind of baby trolley is for the user can easy to go up the stair. It is because most of the people face the problem when go up the stair. Thus, me design will help them to solve this problem.
