

4-WHEEL DRIVE GO-KART

Prepared by: Gan De Khai

ABSTRACT

For doing the project report, I tried to research all the information from the websites and from the library. I also took some references books from my friend. For doing the prototype, I tried to get all the second spare part and useless spare parts from my uncle factor and apply into my prototype so that I will cost safely than using the new spare parts. I recycle the useless spare parts and apply into my prototype.
