

HYDRAULIC BEARING PULLER

Prepared by: Louis Wong Chee Liong

ABSTRACT

This report represent in full detail about my project, Hydraulic Bearing Puller. From this report, reader will be able find out about the operation of the existing bearing puller and my own design of Hydraulic Bearing Puller. Design and construction of the product will be discussed in length to understand the working/functioning of this new product. Photos and AutoCad drawings are included to have a better illustration on the project.
