

MOTORIZED SPIDER-WEB BRUSH

Prepared by: Yap Zer Hau

ABSTRACT

In this century, many people try to reduce their work, so there are a lot of things to help them reduce their works; this is the purpose that I created this machine.

My project title is a Motorized Spider-Web Brush cleaner. My project is a machine that helps people to clean the dust on the ceiling. This machine is very useful because human doesn't need to raise their hand up to clean the ceiling anymore, this machine is able to help them. Those works are more effective.

This motorized spider-web brush is controlled by dc motor, which is suitable for outdoor and indoor using.
