

# **BABY'S PRAM SWITCH LOCK SYSTEM**

Prepared by: Chai Ming Lun

## **ABSTRACT**

---

Nowadays, many cases of accidents which involve children at the age of 3 and below are associated with faulty or unwanted unlock situation of baby pram's wheel locks. Thus an easy lock system which helps to lock the wheels efficiently can be made or produced. This is able to enhance and improve the safety of modern baby prams.

This will be shown in the following contents of this report.
