

AUTO LADDER

Prepared by: Chew Tee Sam

ABSTRACT

Now, manufacturing of new equipments are continuously developing. Thus, the engineers need to develop some new ideas of the products and to improve it in the market. With different kinds of new products, people can live better and more comfortable.

There is a good opportunity to contribute society and thus have design an auto ladder which convenient to everyone in order to do the climbing process. The auto ladder is function by a motor, so it can save a lot time and work in order to climb the ladder. Instead of taking the auto ladder all the time, the user can also bring many things or equipment by both hands in the same time.
