

CUT-AWAY VIEW OF THE CAR ENGINE FOR THE PURPOSE OF TEACHING

Prepared by: Teng Li Gin

ABSTRACT

My project title is 'Cut-Away View of the Car Engine For The Purpose Of Teaching'. Basically it is an engine that had been cut at certain portions. This cut-away section exposes the moving parts of the engine.

This car engine is a good teaching aid., with this cut-away view of the engine, the students no longer learn the subjects such as Mechanics if Machine, Machine Design, Dynamics and so on theoretically, they can observe all the machine elements clearly, get more idea about the engine, and understand better in applying the theory they have done in the class.
