

# TO DESIGN A WATER LEVEL CONTROL PROCESS

Prepared by: Lim Thiam Poh

## ABSTRACT

---

This project paper will describe the 'To Design a Water Level Control Process' that I am constructing and also the overall operation of this project. This project can be widely used in industrial area. The constructions and the components that are being used in this project will also be introduced in this project report. The contains of this report also have the project diagram, circuit diagram and photographed of this project.

Finally, some advantages and disadvantages of this project will be discussed.
