

HANDCYCLE

Prepared by: Bernard Lee Choon Hoe

ABSTRACT

This project report contains vital information about the handcycle. Here, I will describe a short summary of what will be the contents of the whole project report.

Firstly, there is an introduction part giving detailed information about the handcycle, where it is applicable, the people who might be using this product, and the objectives of my handcycle.

Secondly, there will be a write out about the construction of the handcycle with its initial design, coming out with a scaled down model, final design, and the final product. There will also be list of material, components used to build it and an assembly of parts.

The calculations comes after the construction part, where descriptions of the final outcome of the product with a few points of analysis about the handcycle.

Last but not least, the appendix column will have specific information about the material specification, data, diagrams, that are relevant to the report.
