

SECURITY DOOR: OPENING/CLOSING AUTOMATICALLY BY MEANS OF PASSWORD

Prepared by: Reno Wismanto

ABSTRACT

This project paper is intended to be a practical, elementary guide for those who want to know about digital-security door. This type of security door has many advantages, which cover many unacceptable limitation of general-commercial security door, such as hacking and cracking. Moreover, so far, only one acceptable limitation of this type of security door has been discovered. The details and explanation of the advantages and limitation will be discussed in later section. In order to make my points clear, please read the introduction in chapter 1.
