

INTELLIGENT HOME SECURITY SYSTEM

Prepared by: Ooi Kah Chun

ABSTRACT

A home security system is essential nowadays due to the rapidity of robbery and burglary incidence in housing areas. Furthermore, a home security system is also necessary in safeguarding the properties in the house on top of their main objective in preventing burglaries and trespassing.

The final outcome of the project encompasses components such as:-

- A burglar alarm circuit printed in PCB
- A readymade automatic day and light switch, as available in the market
- A pneumatic-controlled prototype security door
