

ELECTRONIC ROAD PRICING SYSTEM AT KL CITY

Prepared by: Khaw Lee Shan, Ong Siew Yong, Yeap Kuen Shin, Wu Wen Wei

ABSTRACT

Basically, this report consists of 4 chapters. The first chapter is Introduction to ERP System, the scope and objectives. The second chapter is construction of the program and the instruction to run the program. Research and analysis and comparison are the third chapter. It mentions how much effort put on research and analysis throughout the 13 weeks time and the advantages of ERP System have been developed. The last chapter is problem encountered, recommendations and conclusion. It shows the problems encountered during construction of ERP System and how they are overcome. For further improvement and development, recommendation is needed for reference. The conclusion is how much valuable experience and self-improvement have been gain from final project.
