

SMART CRANE CONVEYOR SYSTEM FOR INDUSTRIAL PURPOSE

Prepared by: Daniel Lau Cheong Hooi, Tan Kian Horng, Lee Tat Men, Ivan Tan Woei Ren

ABSTRACT

Smart Crane Conveyor System is a new concept. A combination concept of crane and conveyor. Due to their pros and con, we are going to combine both advantages and figure out with a design called 'Smart Crane Conveyor System'. Safety features are being added to our system to avoid personal get injured or cause damage to the surroundings.

Basically, this report will give information on what is the student doing throughout the whole semester. Such as research has been done and also studies made on cranes, conveyors and others material handlings systems.
