

BUNGALOW SECURITY SYSTEM

Prepared by: Chew Yee Hooi, Poon Han Guan, Lim Chuan Jeng, Fung Wen Pui

ABSTRACT

Home security is more than a complete network of both active and passive protection against theft and vandalism. Thus, we are designing a separate-component security system for a bungalow house. In this project, there is detail designing installation of separate-component systems with central unit, sensor, warning devices and detail designing of a bungalow house. Besides, there are briefing on separate-component system and self-contained system with the list out of advantages and disadvantages of each system.
