

DESIGN OF INTEGRATED PAPER DISPOSAL SYSTEM FOR OFFICE

Prepared by: Chea Kok Hong, Chung Ching Kiong, Chew Eng Cheong, Chan Aik Chau

ABSTRACT

This project report is written with the sole purpose to give the readers a comprehensive understanding of the task that has given to us.

This report gives detailed information on every stage of development of our project from brainstorming of idea to the development of the design of the building and machinery. Every aspect of the design is clearly explained without using too many technical terms. This is to make the report much easier to understand for non-technical readers. Illustrations are included where necessary to help a better understand the design process.

We hope that this report will be an interesting and also informative source for those who read it. We also hope that by reading this report, the readers could gain an inside on what is a system disposal paper.
