

A STUDY OF GREENING OF INTI'S STUDENT HOSTELS

Prepared by: Narongrit a/l Som Mai

ABSTRACT

This project focus extensively on various techniques and ways that can be utilized and implemented on INTI International University (INTI IU)'s Student hostels to reduce carbon footprint of the existing student hostels without making any major structural changes . Such action is to audit existing buildings and make them greener is becoming more and more important in the world we live in today. Going green on campus is a lifestyle choice with environmental and cost-saving benefits.
