

PAD GAME CONTROLLED BY PLC

Prepared by: Low Kim Yap

ABSTRACT

The title I have selected for my final project is about the “Pad game controlled by PLC”.

This Project Report contains 4 chapters to discuss.

➤ Chapter 1

This chapter explains about the definition and functions of PLC and the advantages of using PLC.

➤ Chapter 2

This chapter will explain about the operation of PLC, how to program it and how I apply PLC on my project.

➤ Chapter 3

This chapter will display the result, the problems encountered and my ladder diagram.

➤ Chapter 4

This part of the report shows the overall what is learnt through the project and also the importance of PLC for future use.
