

Wave Powered Generator

Prepared by: Albert Tie Siew Seng

ABSTRACT

This report introduces on how a scale down (prototype) wave powered generator function. The purpose of developing this scaled model is to introduce to peoples how the wave powered generator function, as we know that the wave powered generator is not really famous in Malaysia.

The outcome of the project is to present a wave powered generator that can utilizing waves as a motivating force. Other than that, this prototype will also connected to a bulb to prove that it can generate electricity
