

A STUDY INTO THE DESIGN AND COSTING TO THE SOFT AND HARD LANDSCAPING WORK TO A PROJECT AT BANDAR DATO ONN, JOHOR

Prepared by: Yeo Zhi Lei

ABSTRACT

The abstract of this project is to find the suitable location, therefore, the location that chosen is Bandar Dato Onn, Johor. Besides that, according this title need to proposed a new design for the landscape and need to know the usage for the land area, so that, can know how to design a new landscaping. Moreover, also need to know what is hard and soft landscape because in a landscaping design hard and soft landscape are the important items, they can let the scenery for that place look more beautiful and nice. Furthermore, after proposed a new design need to provide the costing for new design of the landscaping works. In the new design for the landscape, need to provide sketches and drawing. In addition, also need to consider the facilities that set up in the landscape are suitable for the children, teenager and old people. Costing for this project get from my friend's father because his father is the supplier. Besides that, some of the price for the soft and hard landscape need to add on the labour cost. During the costing, provide the item can be used from existing ground and maintenance the cost. So that can save the cost for the new landscape.
